

Caspian Rote with (**CASROTE**) brand is working as a shipping agency and consultation of multimodal Int'l transportation with modern engineering and experimental strategies as a reliable int'l transportation with our own methods in section of marketing and supporting our clients around the world as a service provider.

CASROTE was founded on **8 March - 2014** with agency and services providing management experience of its owners **since 2004** including innovation with our own techniques with a different way of thinking, different culture and at the end a different skill to a new way of moving the world in section of marketing, supporting, sales services and after services with the same responsibilities such as yours on your asset:

Punctuality, liability, accessibility and persistence.

### **The parts of our abilities that can be provided to you.**

#### **Seaway:**

we are ready to respond to all your inquiries through our **NVOCC** services as agent for 2 carriers ,

And also we have the potential to support you as a **Freight FORWARDING** to find proper solutions to deliver cargos worldwide. Our global ocean freight services will cover both import and export services

by container for both consolidations (LCL) and (FCL)

special equipment such as **"RF-OT-FR-SFR-PF"** .

Can be supported.

Competitive prices , terms and conditions with leading carriers.

#### **Roadway:**

Door-to-door movement of full trailer loads of freights, and the consolidation of small consignments into full loads for warehouse-to-warehouse trucking and thence delivery to the consignee via European countries to Iranian customs and also from Iran to Europe.

#### **Airway:**

Concentrated around the major international airports, airfreight forwarders provide a high-quality range of services worldwide for urgent and high value freight, and just-in-time stock systems. We also provide airport handling and distribution services, and act as general sales agents for airlines.

#### **Railway:**

For many companies Rail Cargo is the starting point in the search for possibilities regarding to the rail freight market, the complex and high-level services are provided with the available modern equipment and tailored made advice with specific presentation.

#### **Logistics:**

Int'l combined transportation with multiple service provider is merged in logistics reflection that it operated in group of project shipments because logistics is the management of the flow of goods between the point of origin and the point of destination, in regards some requirements of customers or corporations should be done with great result that **CASROTE** will guarantee to it's business partners ,The resources managed in logistics can include physical items, such as food, materials, equipment, and liquids with different packing. The logistics of physical items usually involves the integration of information flow, material handling, production, picking up, packaging, inventory, stuffing/cross stuffing, lashing, warehousing, preparing flexi arrangement, bulk vessel management for oversize or bulk products, customs clearance, transportation, security, insurance and carry your asset.

The complexity of logistics can be modeled, analyzed, visualized, and optimized by dedicated simulation software. The minimization of the use of resources is a common motivation in logistics for import and export.
